

How to Download your Jupyter files

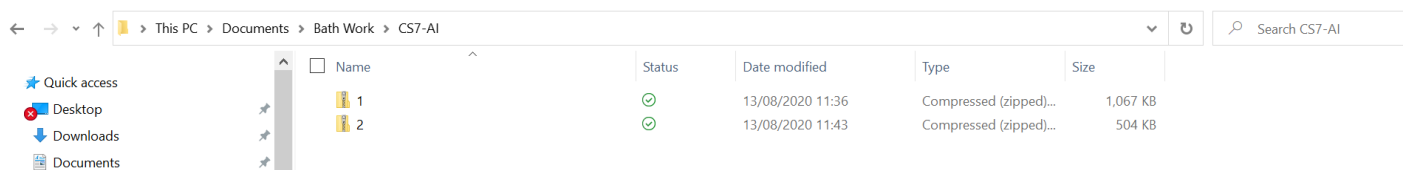

The first set of files you will download are the 'intro_to_python_jupyter.zip' files as part of the 'Before you Begin' section. They look like this:

Select that link from the menu as shown, or from navigating to that page from previous pages using the 'next activity' and 'previous activity' buttons. The files will automatically download to your computer, and you will then need to save them into the **same folder**.

You then need to extract the files from the zip file.

An ideal place to download them to would be Documents then create a folder system perhaps like the image here – Bath Work_CS7-AI. So a folder system that will look something like this:

The instructions are the same for each subsequent week in this unit, you will download lesson activities and/or assignment files each week - you are welcome to download all eight weeks' worth of files before you begin your studies.

Your weekly files will look like this:

Week 1 Files to Download

 [Select this link to download your files for week 1](#)
