

Just to be sure, you should reset the kernel, then run all of the cells again before submission. Click here to reset the kernel, then confirm on the dialog that pops up.

The screenshot shows a web browser window with the URL `localhost:8889/notebooks/release/exercise-sheet-1/exercise-sheet-1.ipynb`. The Jupyter interface includes a menu bar (File, Edit, View, Insert, Cell, Kernel, Widgets, Help) and a toolbar with icons for saving, adding, deleting, and running cells. A red arrow points to the 'restart the kernel (with dialog)' button in the toolbar. The notebook content displays the title 'Exercise Sheet 1' and the section 'Instructions'.

Exercise Sheet 1

Instructions

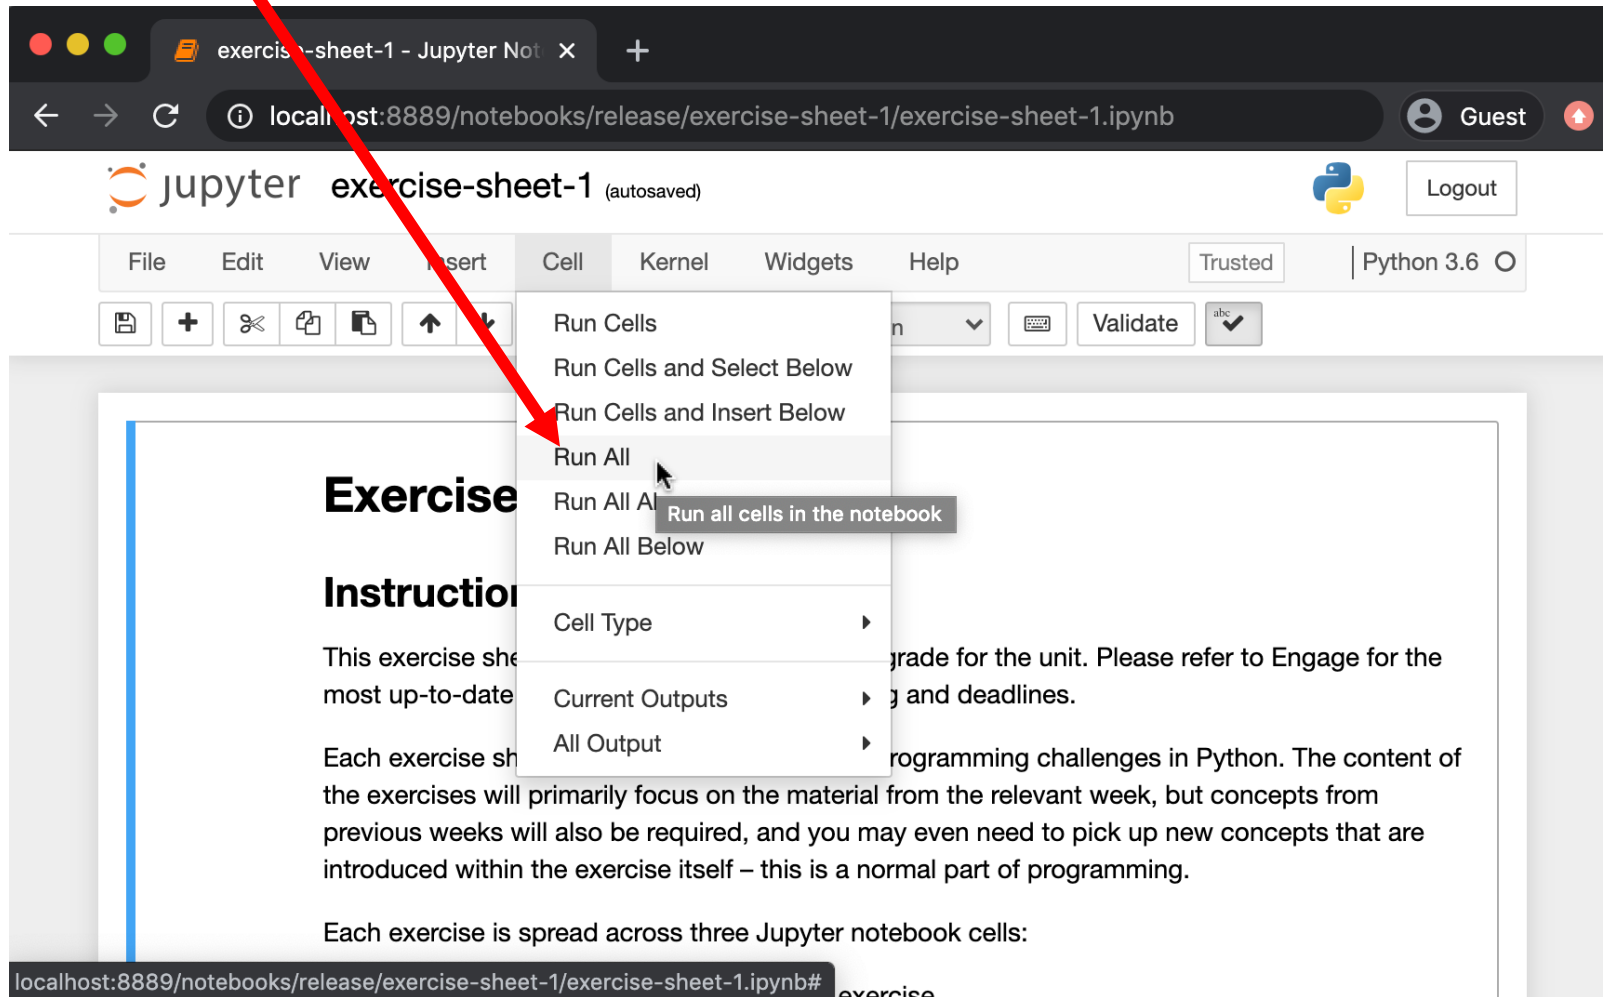

This exercise sheet counts towards your overall grade for the unit. Please refer to Engage for the most up-to-date administrative details on grading and deadlines.

Each exercise sheet will be made up of several programming challenges in Python. The content of the exercises will primarily focus on the material from the relevant week, but concepts from previous weeks will also be required, and you may even need to pick up new concepts that are introduced within the exercise itself – this is a normal part of programming.

Each exercise is spread across three Jupyter notebook cells:

- A text cell (like this one) introducing the exercise

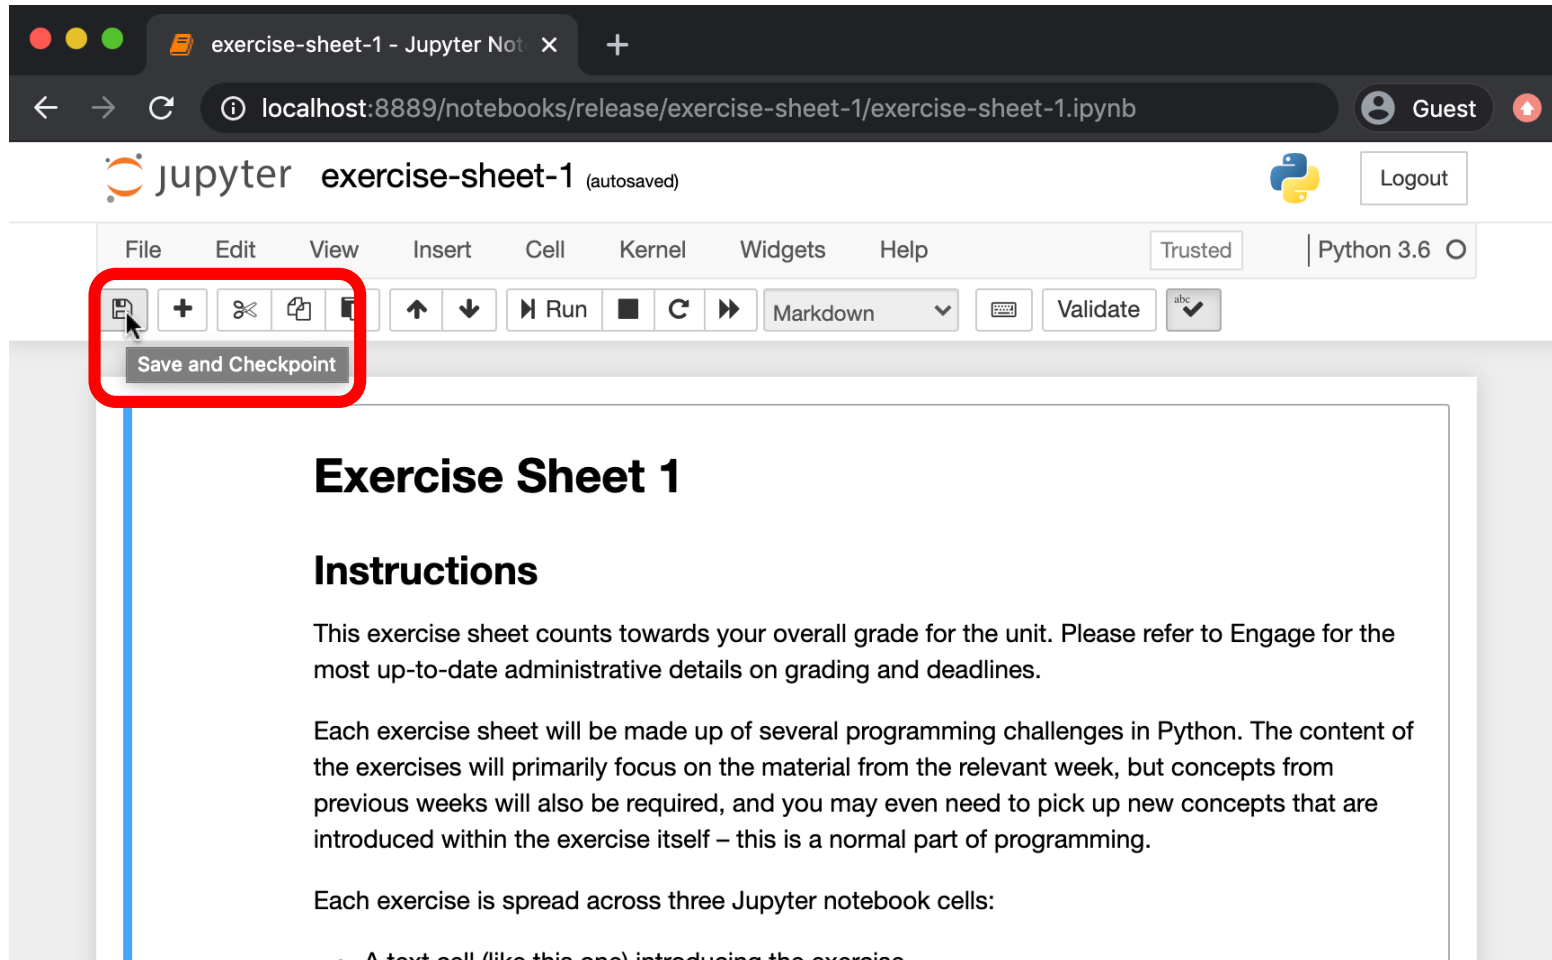

Click here in the Cell menu to run all the cells (Note: click **Run All**, not Run Cells).

The screenshot shows a Jupyter Notebook interface in a web browser. The browser's address bar displays the URL `localhost:8889/notebooks/release/exercise-sheet-1/exercise-sheet-1.ipynb`. The notebook's title bar shows "exercise-sheet-1 (autosaved)" and a "Logout" button. The main menu bar includes "File", "Edit", "View", "Insert", "Cell", "Kernel", "Widgets", and "Help". Below the menu bar is a toolbar with icons for saving, adding cells, and other actions. The "Cell" menu is open, showing options: "Run Cells", "Run Cells and Select Below", "Run Cells and Insert Below", "Run All", "Run All Above", "Run All Below", "Cell Type", "Current Outputs", and "All Output". A red arrow points from the text above to the "Run All" option. A tooltip for "Run All" is visible, stating "Run all cells in the notebook". The notebook content area shows the heading "Exercise" and "Instruction", followed by text about the exercise sheet and programming challenges in Python.

localhost:8889/notebooks/release/exercise-sheet-1/exercise-sheet-1.ipynb#

Check that none of the cells are showing errors. If all of the `assert` functions have run without any errors, then you are good to submit. Make sure the notebook has saved by clicking the save icon on the toolbar.

The screenshot shows a Jupyter Notebook interface in a web browser. The browser's address bar displays the URL `localhost:8889/notebooks/release/exercise-sheet-1/exercise-sheet-1.ipynb`. The Jupyter logo and the notebook title "exercise-sheet-1 (autosaved)" are visible at the top. A menu bar includes File, Edit, View, Insert, Cell, Kernel, Widgets, and Help. Below the menu bar is a toolbar with various icons. The "Save and Checkpoint" icon, which depicts a floppy disk, is highlighted with a red rectangular box. Other icons in the toolbar include a plus sign, a scissors, a document, a trash can, up and down arrows, a "Run" button, a square, a circular arrow, a "Markdown" dropdown, a keyboard icon, a "Validate" button, and a checkmark icon. The notebook content area shows a text cell with the heading "Exercise Sheet 1" and "Instructions". The instructions state that the exercise sheet counts towards the overall grade and that it consists of several programming challenges in Python. A list item is partially visible at the bottom: "• A text cell (like this one) introducing the exercise".

Now go to Engage and select your assignment activity.

Exercise Sheet 1

Add submission

You have not made a submission yet.

Unless specified otherwise in the notebook or on the activity itself, for exercise sheets you *only* need to upload a single file, the notebook itself, which is the file that ends with the extension .ipynb.

File submissions

Maximum file size: 10MB, maximum number of files: 20

Files
